

Demonstration of Proposed Features

Date: 15 March 2026

Team ID: XXXXX

Project Name: Smart Lender – Loan Eligibility Prediction System

Maximum Marks: 1 Mark

Demonstration of Proposed Features

This document presents the features proposed during the planning phase of the **Smart Lender – Loan Eligibility Prediction System** and confirms their successful implementation and demonstration. Since this project was completed individually, the implementation and demonstration were carried out by the student and validated during project testing.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Home Page	Displays the project overview and provides navigation to the loan prediction page.	Implemented	Yes	Successfully demonstrated
2	Loan Application Form	Allows users to enter applicant information required for loan prediction.	Implemented	Yes	All input fields function correctly
3	Input Validation	Checks mandatory fields and validates user input before prediction.	Implemented	Yes	Prevents invalid submissions
4	Loan Eligibility Prediction	Uses the trained Random Forest (model.pkl) model to predict loan approval or rejection.	Implemented	Yes	Prediction generated successfully
5	Prediction Result Page	Displays the loan approval or rejection result instantly.	Implemented	Yes	Results displayed accurately
6	Flask Integration	Connects the frontend with the Machine Learning model through the Flask backend.	Implemented	Yes	End-to-end workflow verified successfully

Feature Implementation Summary

Parameter	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate	100%

Individual Project Summary

The **Smart Lender – Loan Eligibility Prediction System** was designed, developed, tested, and demonstrated as an **individual project**. All planned features were successfully implemented using **Python, Flask, HTML, CSS, and the Random Forest Machine Learning algorithm**. The application accepts applicant details, processes the data, predicts loan eligibility in real time, and displays the results through a simple and user-friendly web interface. The successful implementation and demonstration of all proposed features indicate that the project objectives were fully achieved.
