

Project Demo Planning

Date: 15 March 2026

Team ID: XXXXX

Project Name: Smart Lender – Loan Eligibility Prediction System

Maximum Marks: 1 Mark

Project Demo Planning

This document outlines the demonstration plan for the **Smart Lender – Loan Eligibility Prediction System**. Since the project was completed individually, the entire demonstration will be presented by the student. The demo is designed to showcase the problem statement, solution approach, application workflow, live prediction, and key project outcomes in a clear and organized manner.

S.No	Demo Section	Description	Duration (mins)	Presenter
1	Introduction	Introduce the project, objectives, and the problem addressed by the Smart Lender system.	2	Self
2	Solution Overview	Explain the system architecture, technologies used, and the Machine Learning approach (Random Forest).	3	Self
3	Live Application Demonstration	Show the Home Page, Loan Application Form, user input, and real-time loan eligibility prediction.	5	Self
4	Model & Workflow Explanation	Describe dataset preprocessing, model training, Flask integration, and prediction workflow.	3	Self
5	Project Results & Benefits	Present project outcomes, advantages, limitations, and future scope.	2	Self
6	Question & Answer Session	Answer questions related to the implementation and demonstrated additional scenarios if required.	5	Self

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an automated loan eligibility prediction system and the objectives of the project.
2	Solution Overview	Describe the technologies used, project architecture, and the role of the Random Forest model.
3	Live Feature Demonstration	Demonstrate the Home Page, Prediction Form, user input, and the loan approval/rejection result.
4	Results & Q&A Session	Summarize the project outcomes, discuss future improvements, and answer evaluator questions.
